

Tutorial 06: Architectural Design

Instructions:

Prepare the answers with a PowerPoint file. State your names and student ID on the file.

Q1. What are the two ways in which an architectural model of a system may be used?

Q2. Explain why design conflicts might arise when designing an architecture for which both availability and security requirements are the most important non-functional requirements.

Q3. What are the most important advantages of multi-tier client-server architecture?
